ROVSHAN MURADOV

Middle Go Developer

rovshan2525@gmail.com | @prostoRovshan | Batumi, Georgia | github.com/RovshanMuradov

PROFESSIONAL SUMMARY

Go developer with 3+ years building high-performance, concurrent systems. Specialized in microservices architecture, distributed systems, and real-time data processing. Seeking remote opportunities.

TECHNICAL SKILLS

- **Languages:** Go (Expert), Python • **Architecture:** Microservices, REST APIs, WebSocket, gRPC • **Databases:** PostgreSQL, Redis • **Message Queues:** Apache Kafka • **Tools:** Docker, Git, CI/CD

PROFESSIONAL EXPERIENCE

Middle Go Developer

2021 - Present

High-Performance Trading System | github.com/RovshanMuradov/solana-bot • Built concurrent trading system processing 10,000+ transactions daily with sub-second execution • Implemented multi-wallet management using Go channels and goroutines • Designed modular architecture with factory pattern for extensible integrations • Developed WebSocket service for real-time data streaming and monitoring • Optimized memory usage and reduced latency by 60% through efficient data structures

Distributed Data Processing Pipeline • Architected microservices system handling 1M+ events daily • Implemented message queue integration with Kafka for reliable event processing • Built resilient services with circuit breakers and graceful degradation • Reduced processing time from 5s to 300ms through concurrent optimization

LANGUAGES

- Russian: Native | English: Fluent
